Christ Church Grammar School to host forum on Artificial Intelligence to enhance education

Christ Church Grammar School will be hosting an open forum on the use of Artificial Intelligence (AI) in education next month with educators from schools across Perth meeting to discuss the technology.

This event is an opportunity for educators to network and share their experiences with integrating AI into their curriculum and assessments.

Attendees will hear from peers about ways to apply the technology. A panel of five leaders in the field will present on unique ways of harnessing the power of AI:

Melanie Hastie - Head of English - Christ Church Grammar School

Beth Murphy - Deputy Principal Teaching and Learning Pre-Kindergarten to Year 12 - Newman College

Greg Port - Director of Learning Technologies - All Saints' College

Bradley Middleton - Head of Library Services/English Teacher - All Saints' College

Mehreen Mukaty - English Teacher - St Mary's Anglican Girls' School

Christ Church Grammar School Principal Alan Jones said the School's approach to AI such as ChatGPT is to teach students how to safely and responsibly embrace the technology to support their learning.

"Since the beginning of the year, Christ Church teachers have received training to effectively integrate AI technology into their teaching methodologies," he said.

"Our primary goal is to equip students with an understanding of how ChatGPT and other AI can enhance their learning experiences, while imparting knowledge about the potential consequences of its inappropriate use."

"I look forward to having robust discussions about the transformative potential of AI in addressing educational challenges and fostering innovative teaching and learning methods."
